

CRIB QUALITY & SAFETY TIPS

We pride ourselves on creating some of the most exceptionally designed cribs on the market. You can be assured with each and every Pottery Barn Kids crib that you're providing your child with a truly safe and comfortable place to sleep, dream and grow. Built with solid wood framing and quality veneers, our cribs are rigorously tested to ensure maximum safety and durability. Our Madison and Larkin cribs are now available in new water-based finishes for durability, improved stain resistance and zero odor. The quality testing standards for our children's furniture products meet or exceed all state, federal, ASTM (American Society for Testing and Materials) and Health Canada standards. These methods of product testing are some of the most rigorous in the world today. These standards are constantly being scrutinized and improved upon, and we ensure our

children's products meet all of these requirements. We recommend that babies under one year of age be placed on their backs to sleep. Use a firm, tight-fitting mattress in a crib that meets current safety standards. Only a mattress pad and/or waterproof pad and crib fitted sheet should be used between the sleeping baby and the crib mattress. Consider using a sleeper suit as an alternative to a blanket. If you do use a blanket, place your baby with feet at the foot of the crib and tuck a thin blanket around the crib mattress so that it reaches only as far as the baby's chest. Make sure it rests on top of, not underneath, the baby, and that the baby's head remains uncovered. Pillows, plush animals and quilts are to be considered decorative only and should always be removed from the crib during sleep time and nap time.
